Re: *City of New York v. Abbott Laboratories, et al.*, MDL No. 1456  
(Materials Requested Following FUL Tutorial)

Dear Judge Saris:

This letter will supplement the record on the FUL issues raised in the tutorial and summary judgment argument on June 8, 2009.

Following Dr. Addanki's testimony regarding how, in practice, CMS established FULs, you asked him whether he had his "very helpful chart for every single one of the 31 [FULs]." Defendants undertook to provide you with a complete set of Dr. Addanki's pricing arrays. *See* 7/8/09 Tr. at 38:2-14, and a copy of those pricing arrays is enclosed. Tab A contains the pricing arrays for the 23 out of 31 FULs for which lower published prices existed at the time CMS set the FUL and illustrates, as explained more fully in Dr. Addanki's June 30, 2009 Affidavit [Docket No. 113], that Ms. Gaston's *post hoc* "three WAC rule-of-thumb" cannot explain why CMS chose to disregard these lower published prices in 20 out of 23 cases. Tab B contains the pricing arrays for the 29 out of 31 FULs for which, as Dr. Addanki explained, the national pricing compendia published a lower price at some point while the FUL remained in effect and, yet, CMS declined to reduce the FUL.

We also feel compelled to respond to Ms. Cicala's letter of July 10, 2009, purporting to "make a correction to the record" concerning the number of CMS witnesses who have been deposed in this case. The depositions of many of those CMS witnesses who she claims were deposed in this case were not in fact cross-noticed in this case. *See, e.g.*, Notice of Deposition of Glenda Bailey (attached hereto as Exhibit A) (which shows that Ms. Bailey's deposition was noticed only in the case brought by the United States against Abbott and not cross-noticed in this case). More importantly though, **only two individuals** directly responsible for setting FULs were deposed (Sue Gaston and Gayle Sexton), and those depositions lasted less than a day in total. *See* Excerpts of the Gaston and Sexton Depositions (attached hereto as Exhibit B). Ms. Sexton was not, for example,

ROPS & GRAY LLP

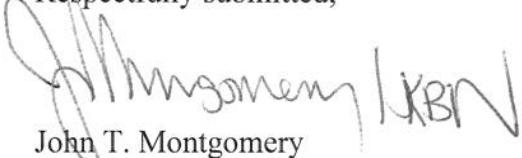

The Honorable Patti B. Saris

- 2 -

July 30, 2009

deposed over two days as Ms. Cicala's letter represents. *Id.* In fact, CMS denied defendants' request to take the depositions of the other current and former CMS employees who were directly responsible setting FULs during the relevant time, citing *United States ex rel. Touhy v. Ragen*. See Exhibit C hereto (March 20, 2008 letter denying defendants' request to depose Cindy Bergin and Peter Rodler).

Respectfully submitted,

1 in the New York counties case. And I'm going to  
 2 focus my questioning on that case. There have  
 3 been nine drugs for which FULs have been  
 4 established that have been singled out for kind  
 5 of focused discovery.

6 And a lot of what I want to do today is  
 7 use I think some of the printouts from the FUL  
 8 application that maybe you looked at to refresh  
 9 your recollection for the deposition and kind of  
 10 walk through the mechanics of how FULs are set to  
 11 kind of drill down and see if we can't better  
 12 understand that process, is a lot of what I want  
 13 to do today.

14 A. Okay.

15 Q. But I just want to before we delve into  
 16 that make sure that we have a common  
 17 understanding with regard to the chronology here  
 18 for a second. As I understand it, from 1991 to  
 19 2003 you were one of the individuals at CMS who  
 20 was responsible for setting the FULs; is that  
 21 correct?

22 A. Correct.

<p>1 thought was appropriate to incorporate into the 2 process of setting FULs you incorporated that 3 information?</p> <p>4 A. For the updates, yes.</p> <p>5 Q. And then annually or some other period 6 of time, at least you began annually at the 7 beginning, there were these systematic updates of 8 the entire list?</p> <p>9 A. Correct.</p> <p>10 Q. Separate and apart from that, what 11 triggered the decision to actually add a new drug 12 to the list?</p> <p>13 A. Most of the time it came out on a new 14 run that we would do. So if we're looking at 15 updating the whole entire FUL list, that's when 16 the new drugs would show up.</p> <p>17 Q. Let me see if I understand. So the FUL 18 system -- when you do the update of the entire 19 list, the FUL system would go back to Orange Book 20 and identify all the drugs that were eligible and 21 also pull in the published prices. So at that 22 time if a drug had gone generic and was now --</p>	<p>1 setting brand-new FULs at the very least they 2 would have been picked up as a part of the 3 complete or the entire update process?</p> <p>4 A. Correct.</p> <p>5 Q. And at that point, just like with any 6 of the other FULs, CMS would have made a 7 determination as to whether it made sense to add 8 a FUL, whether it was reasonable to add a FUL at 9 that time?</p> <p>10 A. Correct.</p> <p>11 Q. Can you remember instances in which a 12 drug was new, came on -- a new drug was 13 identified as a result of the annual update 14 process and CMS decided not to set a FUL?</p> <p>15 A. I can't remember that.</p> <p>16 Q. You can't remember specific examples?</p> <p>17 A. Correct.</p> <p>18 Q. But don't doubt that it happened?</p> <p>19 A. It could have happened.</p> <p>20 MS. MARTINEZ: Objection, form.</p> <p>21 Q. Is there anything else other than 22 having the annual update or receiving information</p>
Page 533	Page 535
<p>1 met the minimum criteria, it would get pulled in 2 and you would at least get one of the printouts 3 we've been looking at like Exhibit 18?</p> <p>4 A. Correct.</p> <p>5 Q. And then you begin a manual review 6 process at that point to decide whether or not to 7 set a FUL?</p> <p>8 A. If it was necessary. It might have 9 enough information we wouldn't have to do a 10 manual review.</p> <p>11 Q. Okay. And there may also have been 12 other instances in which you got the information 13 and decided even though the drug met the minimum 14 criteria in the regulation, for some other reason 15 it wouldn't result in a cost savings or the FUL 16 that would be derived on the basis of the 17 published prices would be too low, you might 18 decide not to set a FUL at that point even though 19 it was eligible?</p> <p>20 A. Yes, if there was a reason not to set 21 it.</p> <p>22 Q. Okay. It sounds like in terms of</p>	<p>1 from industry sources that would have caused CMS 2 in your time period, '91 and 2003, to update the 3 FUL list?</p> <p>4 A. That's all I can think of.</p> <p>5 MR. BUEKER: Okay. Well, that's all I 6 have.</p> <p>7 THE WITNESS: Okay.</p> <p>8 MR. BUEKER: I appreciate your time.</p> <p>9 THE WITNESS: You're welcome.</p> <p>10 MR. Re: Request for testimony in City of New York v. Abbott Laboratories, Inc.; MDL No. 1456; 01-CV-12257-PBS. (D. Mass.)

Dear Mr. Bueker:

I write in response to your letter to Kerry Weems, Acting Administrator of the Centers for Medicare & Medicaid Services (CMS), U.S. Department of Health and Human Services (HHS) and James C. Stansel, Acting General Counsel for HHS, in which you request the deposition testimony of current CMS employees Gail Sexton and Cindy Bergin (the former Cindy Pelter) and a former CMS employee, Peter Rodler, in the above-referenced litigation to which the government is not a party.

As current and former employees of CMS, Ms. Sexton, Ms. Bergin and Mr. Rodler are covered by the agency's "Touhy regulation," 45 C.F.R. Part 2. The HHS Touhy regulation prohibits HHS employees and former employees from providing testimony or producing documents concerning information acquired in the course of performing official duties unless "authorized by the Agency head . . . based on a determination by the Agency head, after consultation with the Office of the General Counsel, that compliance with the request would promote the objectives of the Department." 45 C.F.R. § 2.3. See United States ex rel. Touhy v. Ragen, 340 U.S. 462 (1951); Moore v. Armour Pharm. Co., 927 F.2d 1194 (11th Cir. 1991). The CMS Administrator has delegated the authority to make these determinations to the Deputy Administrator, Regional Administrators, Center Directors, and Office Directors. Pursuant to this delegation, I am responsible for deciding whether to approve your request.

Your request for testimony is made as part of litigation in, City of New York v. Abbott Laboratories, Inc.; MDL No. 1456; 01-CV-12257-PBS (D. Mass.), a matter to which the government is not a party. However, the case is one of several cases that are part of a multi-district litigation (MDL) currently before the United States District Court for the District of Massachusetts. The federal government has also filed a complaint against Abbott Laboratories, Inc. and the case, United States ex rel. Ven-a-Care of the Florida Keys, Inc. v. Abbott Laboratories, Inc., MDL No. 1456; No. 06-CV-11337-PBS (D. Mass.), is also part of the MDL. As part of discovery in the government's case, several CMS employees have been and continue to be deposed on multiple days. Those employees include Larry Reed, Technical Director, Pharmacy Team, with general oversight of the federal upper limit (FUL) program; Deirdre

Page 2 - Mr. Bueker

Duzor, Director, Pharmacy Team; and Sue Gaston, formerly lead Pharmacy Team analyst for the FUL program and currently Team Lead for Dispute Resolution of the Medicaid Drug Rebate Program. Also, as part of discovery in the government's case, CMS has produced current and historical documents demonstrating the establishment of FULs and how FULs were calculated for certain multi-source drugs. CMS has also responded to specific discovery requests concerning the calculation of the FULs. Everything produced by CMS as part of the government's litigation is available to all the plaintiffs and defendants in the MDL, including the Warrick Defendants. Considering the prior and continuing discovery regarding FULs in the government's case, I have decided to deny testimony for Peter Rodler and Cindy Bergin because I believe that such testimony would not promote the objectives of HHS as it is duplicative of previous discovery responses, including prior deposition testimony.

However, I believe that it would promote the interests of the HHS to allow Gail Sexton, the current operator of the FUL program, to testify on the development, to the extent there has been such, of FULs for the following drugs: enalapril maleate (20 mg tablet), lorazepam (1 mg tablet), klonopin (0.5 mg tablet), albuterol (90 mcg inhaler and 0.83 mg/ml solution), metropolol (100 mg tablet), cefadroxil (500 mg tablets and capsule), ranitidine (150 mg tablet), and isosorbide mononitrate (60 mg tablet).

HHS' approval of this request as to Gail Sexton should not be construed as an endorsement by HHS of any statements which Ms. Sexton may make in a deposition. HHS reserves the right to correct any inaccuracies that may occur by filing a brief with the court or by otherwise correcting the record in an appropriate manner.

If you have any questions about this decision, please contact Brian Kelley, of the Office of the General Counsel at (202) 205-8702.

Sincerely,

Dennis G. Smith  
Director,  
Center for Medicaid and State Operations
